

Knows All The Records

All Criminals Dread Chief-Inspector Of Scotland Yard

After 36 years' service, the only man at Scotland Yard who knows the history of every one of the scores of gruesome exhibits in the "Black Museum" is retiring from the London Metropolitan Police. He is Chief-Inspector Ralph Rowe, head of the Criminal Records Office, the dreaded of all Scotland Yard's departments by the habitual criminal. In that department are filed the records of over 600,000 criminals and it is said at the "Yard" that Rowe knows them all by heart. Although by profession a "chief-father," he has done much to set criminals on the right road after they have served their sentences.

From Soup To Dessert

Guests At Dinner Had Open-Heart Menu

Guests at a dinner which opened the East Texas Chamber of Commerce Soybean Conference at Coram, Ala., soybeans— from soup to pie, pie.

Glen D. Davis, assistant manager of the chamber, said there would be soybean soup, soybean salad with soybean dressing, a soybean meat substitute, soybean vegetables, soybean bread, soybean pie, soybean coffee and he promised proper soybean milk.

In Yunnan province of China, superstitious natives direct that they be buried with their favorite books, to bring them back to their relatives' route to their celestial paradise.

A Law Every Mother Should Know and Observe

Never Give Your Child An Unknown Medicine Without Asking Your Doctor First

According to any doctor you consult, the only safe way is never to give your child a remedy you don't know all about, without asking him first. When it comes to "milk of magnesia," that you know every where, for over 60 years doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say "PHILLIPS' when you buy. Ask for your own peace of mind, see that your child gets this; the finest milk made. Made in Canada.

Softly for you and yours
You can assist others by referring to "The Gentle" Phillips' Milk of Magnesia. It is the only one that is gentle on the stomach and children and adults alike. It is the only one that is gentle on the stomach and children and adults alike. It is the only one that is gentle on the stomach and children and adults alike.

Alberta's Fur Market

First Annual Sale In Five Years

Fur trading going to Edmonton this year promises to equal that of 1935, both in volume and quality, according to dealers.

The first annual sale held for five years concluded with total sales of \$100,000 worth of pelts of various kinds. Buyers were present from Milan, Italy; Vancouver, London, Montreal, Seattle, Toronto, New York and Winnipeg.

Among offerings disposed of was a consignment of \$10,000 of weasel pelts. A large shipment of mink pelts was also snapped up by buyers. Prices prevailing at the auction compared favorably with those on the Winnipeg market.

The total value of furs bought in Alberta for shipment last year amounted to \$2,000,000 and it is expected that this sum will be equal this year by the end of the season.

Commendation of the quality of furs was expressed by Riccardo Romano and Joseph Milstein, of Milan, Italy, who represent one of the largest fur buyers for homes in southern Europe. The Italians made several large purchases, particularly of wolf pelts.

Canadian Scientist Honored

L. S. McLaine Elected President of American Association of Entomologists

At the recent annual meeting of the American Association of Economic Entomologists, held in St. Louis, December 30 to January 3, in affiliation with the American Association of Entomologists, L. S. McLaine, chief of the Division of Foreign Pest Suppression, Entomological Branch, Dominion Department of Agriculture, was elected president for 1936.

Mr. McLaine has been associated with entomological and plant quarantine work in Canada since 1913. Largely as a result of his endeavors the Plant Inspection Service of Canada is regarded as one of the most efficient of its kind. The American Association of Economic Entomologists is the largest and most important organization of its kind in the world. The Canadian who was previously elected president of the association, Dr. Arthur Gibson, who was elected in 1927.

SELECTED RECIPES

SOFT GINGER-BREAD

1 cup lard and butter mixed
1 cup sugar
1 cup molasses
1 cup sour milk
1 teaspoon Magic Soda
1 tablespoon boiling water
2 teaspoons each cinnamon and ginger

1 teaspoon each cloves and nutmeg
1 teaspoon salt
3 cups flour

1 teaspoon Magic Baking Powder
Melt shortening; put molasses into a bowl, pour on the hot melted shortening; add sugar, pour in the boiling water, and mix together.

Stiff together flour, baking powder, soda, spices and salt, and add to wet mixture. Beat briskly. Bake in a greased, shallow pan 40 minutes in 350 degrees F. oven. May be served as a dessert. Cut in squares and serve with whipped cream or ice cream sauce.

Question Is Answered

Station Hand In Australia Proves Reptiles Eat Reptiles

Do reptiles eat reptiles? The problem has just been answered. It is proven that snakes can eat snakes.

A report by Austral News from Darwin states that one of the Snake men on a large cattle station went into the bush to secure some choice food and returned with a large "goina" lizard, 4½ feet long.

The station hand noticed something protruding from the lizard's mouth, gave it a tug and pulled out a snake as long as the lizard itself.

The snake, incidentally, had partly consumed a large centipede. Evidently, during the meal the "goina" had seized the snake unawares.

Cuts of durum wheat for use as animal feed and of barley for malting.

Royal Bank of Canada 67th Annual Meeting

Morris W. Wilson, President and Managing Director, Sees Upward Trend of Business Definitely Established
Sydney G. Dobson, General Manager, Reports \$500,000 Increase in Deposits For Second Year in Succession

Basis for optimism for the immediate future is to be found in the accomplishments of the past year, stated Mr. Morris W. Wilson, President and Managing Director, in the course of his address at the 67th Annual Meeting of the Royal Bank of Canada.

In every province of Canada, said Mr. Wilson, the improvement in conditions has reduced unemployment and created increased purchasing power. To the farmers of the west there is an almost immeasurable difference between a price of 40c and 90c for wheat and there is every prospect that by the end of the crop year the carryover will be materially reduced.

In the cities, the burdens and distress due to unemployment have been reduced by an expansion in all lines of manufacturing.

In fact, in recent months the volume of manufacturing has exceeded that in the year 1929.

Marked expansion in the automobile and electrical industries, and in the chemical industry, in the demand for steel, said Mr. Wilson, were also noted.

The sustained activity in the mining industry during the past year, the expansion in 1934-1935 have been outstanding elements in Canadian recovery.

Mining

"The payment, 'provided general wages at a time when many of those employed in other industries were unemployed, was a most encouraging sign of work. Without the expenditures of the mining industry for supplies, machinery and other items, the depression in Canada would have been much more severe. In spite of the low prices and the low level of demand for mineral products, the volume of mineral production in 1935 was more than 10 per cent greater than in 1934. The volume of gold production attained a new high record of 1,000,000 ounces, the highest in the history of the Dominion."

Unemployment

"While employment has shown some improvement during the past year, unemployment is still a major problem. Relief expenditures continue to be a heavy burden on the resources of many local communities. The Dominion Government, in view of these expenditures, has not always been able to meet the public interest. The promised survey by the Dominion Government is awaited with great interest."

Sanctity of Contracts

Reference to the reputation of the last year by one of the Provinces of important long-term power contracts. The "alleged" government was that of illegality, but it is noted that the government of the Province of British Columbia, the aggrieved investors have been denied the right to sue to press their claims. Moral considerations aside, the government has been forced to disregard the policy of repudiation of contracts that may have been entered into by the government because of changed conditions strikes at the very root of the national and economic life. The government, in its lowest terms, moreover, repudiation does not mean that we have made heavy sacrifices to build up and maintain our credit. The government should be held to the standard of the public interest. The promised survey by the Dominion Government is awaited with great interest."

Provincial Finances

"The financial position of some of our provinces has been the subject of frequent discussions during recent months. Economic conditions in Western Canada, and abnormally heavy expenditures for relief resulting therefrom, have necessitated large advances from the Dominion Government. It was inevitable that sooner or later the question of control by the Federal Government over the finances of these provinces would be brought up, particularly in view of suggestions put forward by the Federal Government, for the purpose of securing a more equitable general refunding of provincial debts under the terms of the Statute and thereby assist in balancing the budgets of these provinces."

"The Federal Government, in view of the future, is expected to take effective safeguards against excessive borrowings by provinces in the future. It is expected that the Federal Government will be able to meet its obligations to our constitution. With some such plain merit and recognition of the support of public and of the Dominion Government."

Foreign Trade

"Seven-eighths of our total foreign trade is derived from the United States."

Served On, Worship "Canada"

King George V. was once an officer on a British worship named in Canada. It was in 1880, when a party by that name was part of the fleet at the North American and Western station. He was a sub-lieutenant.

Ninety per cent. of the camphor used in India is burned in quantities as a religious offering.

New Yorkers spent \$3,000 daily in telephone for current time.

Punishment Fits Crime

Caught ill-treating his horse, a young man was made to pay the penalty in Cologne, Germany. An indignant passer-by attached to the youth's neck a long rope and message, "I am a horse-torturer," put him in the shafts and forced him to pull his own cart through the streets.

TEA is delicious

A Crime Invasion

Signs and portents are not lacking that Canada, including the prairie provinces, is to be favored during the coming summer with the presence of a horde of criminals from the United States bent on rapine and slaughter, with the peaceful citizens of this country as their victims.

Indeed, a migratory movement of the dregs and sweepings of the underworld of our neighbor to the south has already commenced and their unbridled and ruthless activities are already being recorded on the police posters in some of the cities across the continent north of the 49th parallel.

Recent newspaper reports have noted during bank holdups, safe-blowings and robberies, accompanied in some cases by particularly cold-blooded and unnecessary murders, unnecessary even for the successful prosecution of the unlawful raids on property which are the primary aim of these crime perpetrators.

These indefatigable visitors from across the line have made their presence felt at Vancouver, Calgary, Regina, Saskatoon, Winnipeg, Quebec and Toronto and have staged coups, sometimes with the assistance of local crissmen with whom they have established contact, and in some cases without such aid.

So far this winter these desperadoes have confined their attention to the cities, principally because, in the western provinces at any rate, climatic conditions make criminal forays on the smaller towns and villages impracticable. If not impossible. With the advent of spring and after more and more roads and highways become negotiable with ease, it is reasonable to assume that some of them will divert their activities in the direction of the small town merchants, the village post office and perhaps even to an occasional farm, unless their nefarious deeds are sternly checked.

The reason for this trend of bandits and thugs, armed with guns and sawed-off shot guns, dynamite and nitro-glycerine, crowbars and jimmies is easily explained. They are being driven out of the south from the country which until recently has afforded them a fairly safe domicile and where they have been able to carry on their iniquitous trade with comparative immunity.

The federal government of the United States is tightening up on the robber and the killer. Substantial advances have been made to police and detective appropriations and forces and a campaign to suppress crime, and especially crimes of violence is well under way and it is believed that with a greater measure of success than has heretofore attended previous sporadic and isolated efforts in the land of the stars and stripes.

Many of the desperate criminals in the United States who have so far escaped the tightening meshes of the police nets in their own country are becoming fearful of their safety if they continue their illegal practices in their own land and are seeking pastures more green elsewhere. For geographical reasons alone they are turning their eyes toward Canada and their footsteps in this country. The advance guard is already here and more may be expected to come when weather conditions facilitate mobile transit.

The United States authorities are taking this action because public opinion in that country has made its voice heard. The people have demanded that steps be taken, if not to rid the country of serious crime, at least to reduce it to a reasonable percentage of the violence that has been its progress. Unless, however, the people of this country are to inherit an unwanted legacy from the States, they, too, must make it known to the authorities that they stand four square behind every effort that can be made to repel an undesirable invasion.

The people and the federal authorities of the U.S.A. are to be commended for the effective campaign they are belatedly waging to rid themselves of a serious blotch on their social and economic life, but the people and authorities of this country must co-operate to see to it that the desecrating is not grafted on to our own tree.

The people of Canada do not want these visiting "gentlemen." They have no desire to afford them harborage. They have no wish to permit them to rob and say innocent citizens, nor to allow them to establish schools for crime with their own criminals and potentials as pupils. For that will be the ultimate outcome if these people are treated with complacency and tolerance. Unfortunately, this country has enough trouble without importing more from outside.

Mayor G. G. McCrear of Vancouver, who visualizes this menace, declared recently that the police forces of this country are inadequate to be equipped to handle effectively such a dangerous invasion, stating in effect, that it is hopeless to cope with 20th century criminals with 19th century equipment.

If Mayor McCrear's inference is well founded it is time to be strengthening the defences. The governments of the country and the provinces will be well advised to spend the necessary money to bring police equipment up to date and to modernize their methods of securing information and of tracking down these foes of society.

Dangerous criminals, such as have invaded Chicago and other American cities are not wanted in Canada. They should be caught as soon as they commence operations in this country. Once caught and the proper evidence produced to convict them, the Bench can be relied upon to deal with them effectively, in accord with the renowned tenets of British justice.

Linen Used By Prince

The Prince of Wales is using Irish linen lundchen cloths with napkins to match, in twosome shades of blue and red, and yellow, at Port Belvedere. He has ordered some of these to be supplied by disabled soldiers, in twosomes, one for breakfast and one for luncheon use.

The earth has supplies of energy to meet every need of man for thousands of years, according to Gustav Engler, Chicago, in the address before the American Chemical Society.

All the electric light in use in the entire United States would illuminate an area of but one square mile as brightly as it is illuminated by sunlight.

All the oceans of the world combined contain 97,072,000 cubic miles of water; one cubic mile contains more than 1,100,000,000 gallons.

VICKS COUGH DROP
